

## **REPLACING STAT 201-0 WITH COMP\_SCI 110-0**

Students who take COMP\_SCI 110-0 might be missing these topics covered in STAT 201-0 that they will be expected to know in Data Science and/or Statistics courses:

- (1) These topics in Python: classes, objects, inheritance, and dictionaries
- (2) Programming in R
- (3) Version control using Git & GitHub
- (4) Scientific communication using basic markdown, specifically Quarto markdown

Students who take COMP\_SCI 110-0 instead of STAT 201-0 are responsible for independently learning these topics before taking a STAT course for which STAT 201-0 is a prerequisite.
